This is information from an entity named Lawrence given to the Explorer.

Ways to improve communication

Topic from Interviewer: Means of communication with any higher powers directly responsible for the growth, development & welfare of life on Planet Earth

Bob: We desire communication so we can understand our purpose, proper direction to spend our energies & time.

Q: Why is human intelligence here on Planet Earth?
(Started on first statement – then stopped with question.)

Q: Receive what they are transmitting, whatever communication they have for us.

A. Different experiment today. Attempt to bring Bob into operation. New wave of communication starting in world, many points, many individuals in today's operation. New factors. Many individuals on this side, many different advisories on progress. We wish to amplify integrity of means. Technology with joint operation and reception. Group operation, many individuals at same time. Group discussion combine thoughts, multi-faceted group, 3-person advisable. Your mind seeking out & beaming. Let us reach into you – relief of your grounding system. Relax as you admit us to your receptive system.

Q: How?

A. Systems good but across group operations & discussions the guards must be broken down. Needs expanded guard around the group to keep out minds, influences that continuously project on Earth. We say you strengthen environment guards & release internal guard so those within communication group are at ease & able to receive thoughts generated from individuals of the group. Combined objectives of the group selected & serve immediate purposes of the group. Not advisable to bring in many Qs or subjects to a particular group. Objectives can change with participants & build up new participants.

Q. How to reduce guards?

A. Project feelings from central part of the body, feeling of love, not from mind directly. Mechanism to open up to another person – breaks down close guard system. Guarding system not through mental but expansion of love feeling. Many parts of transmission through the mind but not all same category thought substance, transmission info contradictory to the info being put out from other points. Important decisions be made as to acceptance of the types of info to be developed & ultimate purposes, combine purposes of the multi-faceted world. Mass thoughts of entire world continuously directed in different manners of different thought transmission groups. Important overall objective be selected, controlled & protected.

Q: How do we ID the properly selected ones amidst the mass of those who do come?

A. Test to each individual without difficulty after discussion with them. This lab has already a number of objectives to attract very different individuals. Selection must be made. Technique to develop specific info on specific areas.

Q: What object for this particular facility will best serve? Our concern is misdirection & waste of time in fruitless directions.

A. Depends on whether you make yourself available to outside groups to accommodate some broad mission, to assist individuals in the world at this time. Different from other, of developing faculties of lab, individuals, overall mechanism to select.
